

Please limit the control of our tv and radio stations. Media concentration in the hands of a few is frightening, dangerous, and not consistent with the American tradition of a free press. Companies like Clear Channel are increasingly distorting the values and traditions of this country.

The fact that this is even possible makes me weep for America's future. Please do not support increasing centralization and censorship by allowing a few companies control what is said to the many. This is not how a free democracy functions.
